## Complete Solutions for Industrial Valves

As a global leader of valve manufacturing, Neway (SSE:603699) is dedicated to the production, research, and development of industrial valves. Neway is committed to providing complete valve solutions to all industries through advanced engineering and innovation.

Neway's product line includes Ball, Gate, Globe, Check, Butterfly, Nuclear, Control, Subsea, Safety valves. Our high quality standards and innovative ability are recognized by many global end users and EPCs. Neway valves are utilized in a wide variety of industries and working conditions such as Gas, Oil, Refining, Chemical, Coal Chemical, Offshore, FPSO, Air Separation, LNG, Nuclear Power, Power Generation, and Pipeline Transmission applications.

## Facilities & Service

Neway has developed a sophisticated multi-plant management system operating one valve assembly plant, one API6A valve plant, three foundries, and one R&D center. Our newest assembly plant was expanded in 2013, and it now covers 35,000 square meters.

Advanced software (ANSYS, FE-Safe, CF-Design, Siemens PLM and NX) is applied here at Neway for the Research & Development of products. We use SAP to control the traceability and status of all products during the manufacturing process. In order to ensure the safety, eco-friendliness, and reliability of our products, we use the most advanced fire-safe, cryogenic, high pressure, and fugitive emission test equipment.

As part of Neway's global strategy, to provide better service to our customers, we have established our overseas subsidiaries in North America, Brazil, Netherlands, Italy, Singapore, and Dubai along with over 80 agents and distributors worldwide.

## High Quality, High Value

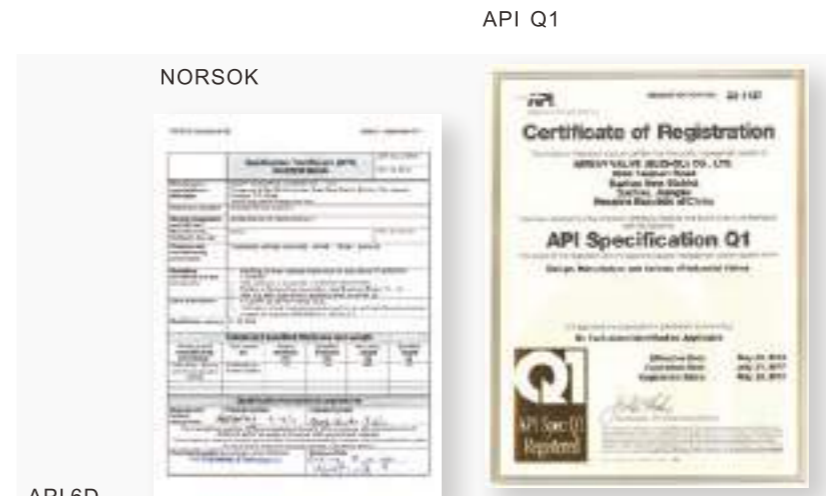

Neway is dedicated to the pursuit of "Zero Defect". We maintain a quality management system that encompasses our entire operation from order entry, to final inspection. Through Neway's continuous efforts, our products have achieved industrial certificates including ISO 9001, API Q1, API 6A, API 6D, CE/PED, ASME N & NPT, TA-Luft, ABS, CU-TR, and Fire-Safe approvals.

## Introduction

This catalogue includes the latest developments in NEWAY Ball Valves with 4 different designs:

- **BT series:** Side entry cast steel trunnion mounted type
- **BS series:** Side entry forged steel trunnion mounted type
- **BE series:** Top entry trunnion mounted type
- **BW series:** Fully welded trunnion mounted type

All Ball Valves conform to BS5351 and API 6D, and are Fire-Safe tested and certified to API 6FA and API 607.

API 6D

TA Luft

AD2000

Neway recognizes the importance of valve quality for the safety and protection of personnel health and property. It is our quality commitment to focus our resources to provide our customers with first class products at a competitive price, that are designed, manufactured, inspected and tested in accordance with our customer's specifications and that comply with all international standards.

With respect to the facts that the current industrial standards do not always take into consideration the likelihood and consequences of possible deterioration in service, related to specific service fluids or the external environment in which they operate. Our customers are requested to keep an open line of communication with our engineering department to identify and implement standards, that will provide valves with the possibility of deterioration in service, so as to ensure safety over the valves expected lifetime.

# How to order

## Example:

Neway figure numbers are designed to cover essential features. When ordering, please show the figure numbers and a detailed description to avoid misunderstanding of your requirements.

## Following descriptions provide a basic guideline in valve specification:

### ① Valve Sizes

#### Full bore:

In	2	2-1/2	3	3-1/2	4	5	6	8	10	12	14
mm	50	65	80	90	100	125	150	200	250	300	350
In	16	18	20	22	24	26	28	30	32	34	36
mm	400	450	500	550	600	650	700	750	800	850	900
In	38	40	42	44	48	52	54	56	60	--	--
mm	950	1000	1050	1100	1200	1300	1350	1400	1500		

#### 6D Reduced Bore:

In	2x1-1/2	2-1/2x2	3x2	4x3	6x4	8x6	10x8	12x10	14x10	16x12	18x14	20x16	22x18	24x20
mm	50x40	65x50	80x50	100x80	150x100	200x150	250x200	300x250	350x250	400x300	450x350	500x400	550x450	600x500
In	26x20	28x24	30x24	32x26	34x28	36x30	38x32	40x34	42x36	46x40	48x42	54x42	56x48	60x48
mm	650x500	700x600	750x600	800x650	850x700	900x750	950x800	1000x850	1050x900	1150x1000	1200x1000	1350x1050	1400x1200	1500x1200

### ② Valve Types

Symbol	Valve Type	Symbol	Valve Type
BS	Side entry forged trunnion mounted type	BSP	Side entry double piston effect trunnion mounted type
BT	Side entry casting trunnion mounted type	BSE	Side entry Self relieving Double piston effect trunnion mounted type
BE	tope entry trunnion mounted type		

### ③ ASME Class

Code	1	3	4	6	8	9	15	25
Class (LB)	150	300	400	600	800	900	1500	2500

### ④ End Connections

Symbol	End
R	Raised face flanged end
J	RTJ flanged end
B	Butt-weld end

### ⑤ Operator

Symbol	Description	Symbol	Description
	Lever	BS	Bare shaft
G	Gear operator	H	Hydraulic actuator
M	Electric actuator	L	Gas over oil actuator
P	Pneumatic actuator	D	Electric over oil actuator

### ⑥ Body Materials

Steel Classification	Cast Material	Forging Material	Recommended Temperature Limits		Application
			°C	°F	
Carbon Steel	A216 Grade WCB	A105N	-29 to 425	-20 to 800	Steam, petroleum products, oil vapour, gas and general service
Carbon Steel	A216 Grade LCB	A350 Grade LF2	-46 to 350	-50 to 650	Low temperature
Carbon Steel	A216 Grade LCC	A350 Grade LF2	-46 to 350	-50 to 650	
Duplex Stainless Steel	A995 Grade 4A	A182 Grade F51	-51 to 315	-60 to 599	Corrosion resistance
Duplex Stainless Steel	A995 Grade 5A	A182 Grade F53	-51 to 315	-60 to 599	
Austenitic Stainless Steel	A351 Grade CF8M	A182 Grade F316	-196 to 815	-320 to 1500	High and low temperature corrosion resistance
Austenitic Stainless Steel	A351 Grade CF8	A182 Grade F304	-196 to 815	-320 to 1500	
Low Carbon Austenitic Stainless Steel	A351 Grade CF3M	A182 Grade F316L	-196 to 815	-320 to 1500	Cryogenic service is also available upon request
Low Carbon Austenitic Stainless Steel	A351 Grade CF3	A182 Grade F304L	-196 to 815	-320 to 1500	

### ⑦ Trim Codes

## Self Relieving Seats (single piston effect)

The single piston effect is the standard design for trunnion mounted ball valves. Pressure from both upstream and downstream sides pushes the seat rings against the ball.

If the force created by the body cavity pressure is greater than the preloaded spring force plus the force created by the pressure from upstream or downstream side, the seats are pushed away from the ball. Thus, any overpressure in the body cavity is released automatically in the valves' fully open or fully closed position.

## Double Piston Effect Seats (DIB-1)

Double piston effect seats are pressure energized in both directions. So the seat rings are always pushed against the ball by the pressure from upstream/downstream or from the cavity.

If the upstream seat fails, the downstream seat can still ensure a tight seal. Widely used in specific applications (high integrity required) or for some pipe pressure testing. Since double piston effect valves do not have the self-relieving function, the automatic cavity-pressure relief valve shall be provided, unless otherwise agreed.

## One Self-Relieving Seat and One Double Piston Effective Seat (DIB-2)

If the force created by the body cavity pressure is greater than the preloaded spring force plus the force created by the pressure from pipeline, the cavity pressure releases via the self-relieving seat, the double piston effect seat still functions a tight seal.

## Cavity Pressure Relief

When force created by cavity pressure ( $P_c$ ) is lower than the force created by line pressure ( $P_l$ ), i.e.  $\Delta P \cdot D_1 < F_s$ , then contact between ball and seat ring is assured to provide a tight seal.

When cavity pressure is higher than seat spring force plus line pressure, i.e.  $\Delta P \cdot D_1 > F_s$ , the self relieving action allows the valve seat to move slightly away from the ball surface. Therefore, any overpressure inside the body cavity is discharged into the pipeline to restore the balance between the body cavity and the pipeline (either upstream or downstream side).

### Anti Blow-out Stem

The stem is made separately from the ball. The lower end of the stem is designed with an integral shoulder to be blowout-proof.

### Anti-static Device

The Antistatic Device is a standard feature of the NEWAY ball valve. A spring-loaded pin assures the electrical continuity between the ball, stem and body, to avoid sparking during the turning of the stem to open and close the valve.

### Super Fire safe design

#### External leakage prevention

Leakage from the valve stem area is prevented by two O-ring seals and a gland gasket. Leakage through the valve body connection is also blocked by an O-ring seal and a body gasket. After a fire deteriorated the O-rings, gland and body gasket, the firesafe stem packing prevents external leakage.

#### Internal leakage prevention

After the soft sealing materials are decomposed or deteriorated by fire, the edge of the metal seat preloaded by the seat spring comes into contact with the ball to shut off the process media and minimize internal leakage through the valve bore. Also the fire safe graphite packing is compressed by the seat spring to prevent process media leakage between the valve body and the seat.

## Double block and bleed

In the closed position, each seat shuts off the process media independently on each side, or simultaneously on both sides of the ball, the cavity can be vented / bled via vent or drain plugs on the valve body.

### Emergency sealant injection system

For 6 inch and larger NEWAY Trunnion mounted ball valves, sealant injection fittings will be installed on both the stem and seats. When the sealing materials (soft seat or the stem o-ring) are damaged, the seat and stem leakage can be prevented by the sealant injected into these fittings. The fitting shall include a check valve secondary means of sealing. For 4 inch and below, it could be added upon requirement.

## Internal stem stop design

During actuator installation, actuator's travel stop has to be adjusted according to the fully open and fully closed position of valve. This stem stop can help to find fully open and fully close position easily.

### DELTA RING seat design (optional)

The material of delta ring is elastomer, which has better elasticity, can "absorb" the deviation in the ball, to obtain zero leakage easily, especially for large-sized ball or austenitic ball or full-welded ball valve. This is an optional design, not for standard.

### Lipseal design (optional)

Lipseal is the spring-energized seal including Elgiloy or Inconel spring and PTFE jacket. It's effective in a wide range of application, such as high resistance to corrosive chemical media, high sour gas, low temperature or cryogenic service.

### Metal-to-metal seat design (optional)

When valve is applied in the high abrasive or high temperature service, metal-to-metal seat shall be chosen.

- 1 Two O-ring Seals: Prevent leakage from stem area.
- 2 Blow-out Proof Stem : Safety feature that functions to assure stem sealing at all pressures.
- 3 Back-up Metal to Metal Sealing: When primary soft-seat material is deteriorated by fire, the metal-to-metal provides shutoff.
- 4 O-ring & Gasket Combination: Prevents leakage from body connection area.
- 5 Floating Spring-loaded Seats: Assure sealing even at low pressures.

- 1 Emergency Sealant Injection Fitting: Prevents leakage from the stem.
- 2 Blow-out Proof Stem: Stem functions as the backseat to assure stem sealing at all pressures.
- 3 Emergency Sealant Injection Fitting: Prevents leakage from the seat.
- 4 Drain plug : Relieves the body cavity.
- 5 Double Sealing O-rings: Prevents leakage from stem area.
- 6 O-ring & Gasket Combination: Prevents leakage from body connection area.
- 7 Floating Spring: Loaded seats assure sealing, even at low pressures.
- 8 Metal-to-Metal Sealing: When soft seals are deteriorated by fire, seat float to shut off the line media.

- 1 Two O-ring Seals: Prevent leakage from stem area.
- 2 Blow-out Proof Stem : Safety feature that functions to assure stem sealing at all pressures.
- 3 Back-up Metal to Metal Sealing: If primary soft-seat materials are burned, the metal-to-metal provides shutoff.
- 4 One-piece Body: Same rigidity as that of pipe.
- 5 O-ring & Gasket Combination: Prevents leakage from body connection area.
- 6 Floating Spring-loaded Seats: Assure sealing even at low pressures.
- 7 Emergency Sealant Injection Fitting: Allows external intervention to prevent seat leakage.

Note:

- Torque is calculated based on normal temperature.
- Torque shown in this table is to be used as a guide for actuator selection. A safety factor of 1.3~1.5 is recommended for actuator sizing.
- Torque may be changed depending on fluids and trim materials.

Flow Coefficient (Cv value) Specification

Size (inch)	Class 150	Class 300	Class 600	Class 900	Class 1500
1/2	25	25	20	16	16
3/4	56	56	48	34	34
1	95	95	64	55	55
1-1/2	308	308	308	165	165
2	500	430	370	320	320
3	1360	1100	1020	920	820
4	2500	2000	1850	1760	1600
6	5300	5250	4400	4300	4150
8	10750	10100	8450	8475	8010
10	17500	16820	14250	14160	13220
12	26750	25950	22550	21200	18800
14	31850	30900	28500	26700	24180
16	44000	42600	38150	36600	33150
18	58000	55870	51150	49000	45703
20	75500	72500	68500	64600	60750
22	91770	86850	80150		
24	113400	109340	98860		

Notes:

- All sizes belong to full port.
- Pressure ratings are per API 6D.

Method of Calculating Flow

The Flow Coefficient Cv value is the flow rate of water (gallons/minute) through a fully open valve with a pressure drop of 1 psi to find the flow of liquid through the valve with Cv, using the following formulas.

Liquid Flow:

$$Q_L = C_v(P/G)^{1/2}$$

QL = Flow rate of liquid (gal. /min.)  
 P = differential pressure across the valve  
 G = specific gravity of liquid (for water, G=1)

Gas Flow:

$$Q_g = 61C_v(P^2P/g)^{1/2}$$

(For non-critical flow, P/P<1.0)  
 QL = Flow rate of gas (CFH at STP)  
 P2 = outlet pressure (psia)  
 g = specific gravity of gas (for air, g=1.0)

Seller will replace without charge or refund the purchase price of products provided by Seller which prove to be defective in material or workmanship, provided in each case that the product is properly installed and is used in the service for which Seller recommends it and that written claim, specifying the alleged defect, is presented to the Seller within 18 months from the date of shipment or 12 months after installation, whichever occurs first. Seller shall in no event bear any labor, equipment, engineering or other costs incurred in connection with repair or replacement. The warranty stated in this paragraph is in lieu of all other warranties, either expressed or implied. With respect to warranties, this paragraph states Buyer's exclusive remedy and seller's exclusive liability.

Note: Other materials are available upon request.  
 If the operating condition is beyond the range above, please contact NEWAY's technical team.  
 NEWAY reserves the right to update without notice.
